PROJECT SUN STREAK (U)

SRV SESSION PROCEDURES REPORT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CONTROL NUMBER: 8702

NICKNAME: None

DATE OF SESSION: 24 Mar 87

TARGET COUNTRY: UR

REFERENCES: None

SESSION NUMBER: 01

DATE OF REPORT: 25 Mar 87

MISSION STATUS: Continuing

TECHNIQUE UTILIZED: SRV

SOURCE IDENTIFIER: 101

1. (S/NF/SK) TASKING: Prior to the session, a small opaque envelope was prepared by hand lettering the number "8702", (the mission reference number), across the front of the envelope. Additionally, a penciled "due date" of 24 March 1987 was included on the envelope. Sealed inside the envelope was a small sheet of notebook paper on which was written the following tasking: "Project FY8702. Interviewer/Monitor Tasking - 1. Describe the structure known as Building "C" 451200/633160. NOTE: "Building C" is in a complex of other lettered (A, B, etc) buildings. Building "C" is the most unusual at the complex." 2. "To be Announced" (A reference to the operational feedback date). This tasking was an exact duplicate of the original tasking received by the undersigned, (the Task Monitor), in preparation for this and other sessions conducted with other Remote Viewing (RV) Sources pertaining to this target. The Task Monitor was also provided additional operational data pertaining to the actual target, however, none of this background information was provided with the sealed envelope. The Source was given the envelope prior to noon on 23 March 1987, and told to keep the envelope in His possession and to provide a written summary of His RV impressions pertaining to the tasking sealed in the envelope on the suspense date indicated on the envelope. No other cuing or restrictions/guidance were provided to Source except to remind him to keep the envelope sealed and to provide His written results by close of business, 24 March 1987.

2. (S/NF/SK) SESSION: This "session" was the first in a planned series of Spontaneous Remote Viewing (SRV) sessions to be conducted utilizing this Source. The Source is provided His tasking in a sealed envelope and provided a short [illegible]

day) in which to submit His written impressions. No other Task Monitor interface or assistance/control is provided. Following this initial session, Source will be provided further sealed envelopes containing more site specific tasking based upon an evaluation of the data provided below.

3. (S/NF/SK) SUMMARY:

a. (S/NF/SK) The following narrative, contained within quotation marks, is an abridged copy of Source's written impressions pertaining to the tasking method explained above. This summary has been editorialized, (as indicated), by the undersigned for clarity, grammar and structure. The actual unabridged summary is maintained in the mission field dossier at this location along with all other material relevant to this tasking, i.e., the envelopes, tasking sheets, sketches, etc. BEGIN SUMMARY: "(The) climate (at the target site) is cool but not unpleasant. It is damp and there are small pools or ponds of standing water. (There is a) large building, open (areas) around it...(accompanying sketch depicted essentially a rectangular structure), and probably (an)other tall building behind it. There is a circular patter on the (the) ground...(accompanying sketch depicted a circular pattern similar to a traffic circle), (located) in part of an open area. (The) building is new. There is a lot of activity on the ground floor (by both) civilians and people in uniforms, brown I believe. I perceive a civilian coming in and receiving a sheet of white paper from (a) man in (a) lobby. He reads (the) paper as (he) is walking to (the) elevator. (He) rides the elevator up to (an) office area (where there are) less people. This man projects and plots (things) like plotting on a map. There will be additional people coming to this office in (the) future. At meetings (held here) the people are reserved and treat each other with a formal courtesy almost like the bloody British. They are concerned with collecting, constructing, collaborating, supporting, recommending, repairing and guiding. Their concerns (are) in the future and it is ongoing. People here are intelligence (but) they do not feel like scientists, soldiers or intelligence types. (In) another part of (the) building, people are (perceived) putting pieces (of something) in a small, white, plastic-like box. In another part (of the building), people look at things through some kind of glass." END SUMMARY

b. (S/NF/SK) Source's data was interesting and tantalizing in that He seems to have hit upon the concept of a building construction site and the idea of continued planning going on around this site. Since no Interviewer was present to interrogate the Source on some of the items provided in His summary it cannot be determined what was meant by some of His references. As an example, "brown uniforms" may be a reference to military dress or

simply common or standardized laborer uniforms. Further, it could not be determined if Source were actually "bouncing" around several buildings at the site since He mentioned in one moment the idea of new construction and in the next the idea of standing in a lobby and moving to office areas by way of an elevator.

4. (S/NF/SK) OPS FEEDBACK: Source appears to have acquired the proper target and to have "pushed up against" the actual tasking. In subsequent tasking Source will be told that He has in fact acquired the proper target and that more specific tasking is located in the envelopes provided to him.
